

Venue Redundant power supply Modification. We can furnish you with a stand alone box. Like the one below,

Or modify your Venue

What you do is use two venue power supplies. You can either use the same AC source or different breakers.

Or you can use any 12v battery, (camera battery) and it will be your power source if the power supply or the AC source fails. The 12v battery will not be used unless the other DC source fails.

There will be two DC input jacks on the receiver and two Leds to show power has been applied to the Venue Rack.
